

PETITION

Mr. Glenn T. Seaborg  
 To: Chairman of Atomic Energy Commission

CC: Division of Reactor Licensing  
 Dir. and Secretary

Washington, D. C. 20545

Gentlemen:

As a tax payer citizen I hereby wish to intervene in the granting of a license to operate the Dresden Plant near Morris, Illinois and also close to Dwight, Illinois.

At the recent hearings at Morris, Illinois there was no representation of people from Dwight, directly down wind from this plant (Livingston County).

In the last four years hundreds of children, many sick, and thus in poor physical condition have been moved into this region, (Wm. Fox Hospital (Dwight, Ill.) under the auspices of both the State of Illinois and the Federal Government.

During the various stories in the paper and upon my personal checking it would seem that the residents of Livingston County, particularly Dwight, Ill. have been kept in the dark about the many unpleasant features and obviously conflicting testimonies of various "experts" in this field.

Commonwealth Edison wields vast power thru this state. A recent picture showed Mrs. Richard Nixon, the First Lady, being escorted thru this plant by Mrs. J. Harris Ward, wife of Chairmen of the Board of Commonwealth Edison. A few weeks later Mrs. Nixon was shown surrounded by groups of children and getting an award for her kindness to children in Chicago. I wonder if she is aware of the situation in Dwight.

Again, Mr. Thom. G. Ayers, President of Commonwealth Edison, has been under a newspaper barrage concerning his son William Ayers a self avowed revolutionary. A strange part of this is the son went with a Miss Diana Oughtton, daughter of James Oughtton head of the bank in Dwight, Ill. which is attached to the 9 buildings where the children are kept. He was a blue ribbon (so-called candidate) in 1964-66 and shortly thereafter these sick children were moved in to Dwight. Mr. ~~Ayers~~ Oughtton is also in business with Judge Hoffman of the Court System in Grundy Co., Morris, where these hearings were held.

Dr. Crane, heard of the above Hospital, didn't even know about the hearings. It takes no stretch of the imagination to realize that inasmuch as Mr. Oughtton, Pres. of the Dwight bank also, can pretty much put pressure on the local newspaper in Dwight. The proof is there was no representation from Livingston County and why? Was there a news blanket?

The State of Illinois, Public Health Dept. did not give a good report about the emanations from this plant. A representative was at the hearings from Springfield. This was not deeply enough reported.

DL

Again, next, back to Mr. Ayers of Commonwealth Edison if his son is an avowed revolutionary and his girlfriend Miss Oughton was blown up in New York (townhouse blast) see Papers of March 6, 1970) perhaps the man shouldn't have security clearance. (see Chicago Daily news during weeks of Sept. 13, 1970.)

These above stories had a strange ring of absurdity and/like a badly written scenario. The oddest of all is that Chicago Daily News Sun Times and New York Times papers are connected with a wire service that is also connected thru interlocking directorships with Commonwealth Edison. Namey, one E. Byron Smith (Head of Field Enterprises) . Mr. Smith, Mr. Marshall Field, and the Oughton Family are all connected by marriage and family ties, and obviously, self interest.

At any rate, the fate of the people downwind from this plant. The danger to the people who are not being informed due to whatever pressures are behind the scene; both political and self interest, should be of prime concern to your Commission.

The staging of hearings with people brought in from Universities, some of them with vested interests (the U. of Chicago was on both sides of the fence) and some like 2 law students (Mr. Spears and Mr. Sugarman) who saw nothing, know nothing and say nothing) Along with the no reporting of the hearings before the Dec. deadline of the 20th by the Bulletin of the Atomic Scientist Magazine (again controlled by Field Interests) (the Uiv. of Chicago has people on its boards from both Field and Commonwealth Edison)

If a an elaborate game strategem has been going on it is time to investigate and stop all the nonsense.

I again reiterate, that I protest any granting of this permit to the above Commonwealth Edison Organization and feel that if you cant do an efficient investigation that the Dept. of Transportation, (Navigable waters on which the Dresden Plant sits.) or Army Corps of Engineers (altho they need investiaction also) be notified.

The public sits on the horns of a dilemma between fighting Govt. Agencies and self interest groups.

Sincerely,  
  
Harriet Sherman
