

November 27, 1972

Docket No. 50-249

Dr. Chester P. Siess
Chairman, Advisory Committee
on Reactor Safeguards
U. S. Atomic Energy Commission
Washington, D. C. 20545

Dear Dr. Siess:

Sixteen (16) copies of the following are transmitted for the
Committee's information:

TWX from Commonwealth Edison Company dated November 20,
1972, reporting that the Dresden Unit 3 main steam line
low pressure switches were out of calibration.

Sincerely,

Distribution
