

ENVIRON

MAR 24 1972

Docket No. 50-249

Mr. Byron Lee, Jr.
Assistant to the President
Commonwealth Edison Company
P. O. Box 767
Chicago, Illinois 60690

Dear Mr. Lee:

In connection with the preparation of our Environmental Statement for Dresden Nuclear Power Station Unit 3, we have established a program for estimating the type and quantities of nuclides to be released annually from this facility. Personnel from the Oak Ridge National Laboratory are assisting us in this part of the environmental review. For this program we need basic data for a source term calculation and for a gaseous and liquid effluent analysis that specifically relates to Dresden. Much of this information may already be in your application or Environmental Report, but to expedite the review we require a tabulation of this information as indicated in the enclosed list. Any data that is inconsistent with information in your SAR or Environmental Report should be identified. Forty-five copies of separate answers should be submitted for (1) the facility as presently designed, and (2) any projected design changes.

This information should be provided by April 21, 1972. If it is impossible to meet this schedule, please let us know. We would like to meet with you and representatives of Oak Ridge at the Dresden site on April 27 and 28, 1972 to discuss the use of this information in our environmental analysis. Tom Row from Oak Ridge National Laboratory will contact you with details about the meeting.

Sincerely,

Original Signed by
Roger S. Boyd
Roger S. Boyd, Assistant Director
for Boiling Water Reactors
Division of Reactor Licensing
