Gentlemen:

Your letter of November 8, 1974, requested an amendment to License Nos. DPR-19 and DPR-25 to delete from the Technical Specifications the requirement to conduct supplementary environmental monitoring whenever airborne radioactive effluents exceed one-third of the limits. The Technical Specifications section to be affected, Section 4.8, is currently under our review for incorporation into the Environmental Technical Specifications (Appendix B). Therefore, we will take your request into consideration in preparing Appendix B and defer action on your request until Appendix B is issued.
