The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This ensures transparency and allows for easy verification of the data.

In the second section, the author details the various methods used to collect and analyze the data. This includes both manual and automated processes, highlighting the challenges of data integration from multiple sources.

The third part of the document focuses on the results of the analysis. It shows that there is a significant correlation between the variables studied, which supports the initial hypothesis. The data indicates that the proposed model is effective in predicting the outcomes.

Finally, the document concludes with a summary of the findings and a list of recommendations for future research. It suggests that further studies should be conducted to explore the long-term effects of the variables and to refine the model.

Office of Nuclear Reactor Regulation  
Attention: Mr. Edward J. Butcher, Acting Chief  
Operating Reactors Branch #3  
Division of Licensing  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Butcher:

Re: St. Lucie Unit Nos. 1 & 2  
Docket Nos. 50-335 & 50-389  
TMI Action Item II.D.1  
Request for Additional Information  
NRC TAC Nos. 44617 & 51605

Florida Power and Light Company (FPL) has reviewed the requests for additional information contained in NRC letters of June 21, 1985, and July 11, 1985.

In order to provide the requested information, FPL will have to obtain information from the NSSS vendor and Architect-Engineer. We anticipate being able to provide a schedule for responding to the requested information by October 31, 1985.

Very truly yours,

*for* *RR Jennings*  
J. W. Williams, Jr.  
Group Vice President
