Office of Nuclear Reactor Regulation  
Attention: Mr. Harold R. Denton, Director  
Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Mr. Denton:

Re: St. Lucie Units 1 and 2  
Docket Nos. 50-335 and 50-389  
ATWS Implementation Schedule

On August 16, 1985 (L-85-309), FPL notified the NRC that a preliminary schedule had been developed for implementation of modifications required under 10 CFR 50.62 and based on the schedules it would not be possible to implement the modifications by Spring of 1986 for St. Lucie Unit 2, nor by Spring of 1987 for St. Lucie Unit 1, in accordance with 10 CFR 50.62(d) requirements.

FPL is a member of the Combustion Engineering Owners Group (CEOG) and participating in CEOG ATWS subcommittee.

On August 28, 1985, the CEOG met with the NRC staff to discuss the CEOG approach for compliance with 10 CFR 50.62. In order for the staff to arrive at a decision on the CEOG approach, further information on the diversity between the reactor trip and the emergency/auxiliary feedwater actuation function was requested by the NRC.

The results of the CEOG Review (CEN-315 Summary of the Diversity between the Reactor Trip System for C-E Plants) were transmitted to the NRC Staff by letter dated September 18, 1985. FPL needs to evaluate the results of the NRC review on its facilities in order to determine the best approach for the St. Lucie Units and when modifications can be installed.

FPL will provide NRC the St. Lucie schedule to comply with the ATWS rule 90 days after the NRC completes its review of the CEOG approach to ATWS

Very truly yours,

J. W. Williams, Jr.  
Group Vice President  
Nuclear Energy

JWW/GRM/cab
