NOV 1 3 1985

L-85-431

Office of Nuclear Reactor Regulation
Attention: Mr. Edward J. Butcher, Acting Chief
Operating Reactors Branch #3
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Butcher:

Re: St. Lucie Unit No. 1
Docket No. 50-335
Inservice Inspection Program

Florida Power & Light Company (FPL) letter L-85-149, dated April 5, 1985 requested NRC's approval for extension of the first ten year inspection interval for St. Lucie Unit No. 1, due to the extended outage for the core barrel repair, which began on February 26, 1983 and ended April 16, 1984.

Section XI of the ASME Code, incorporated by reference in Section (b) of 10 CFR 50.55a "Codes and Standards", allows for such extensions of the inspection interval for extended continuous outages of six months or more.

The current inspection interval expires on December 21, 1986. In FPL letter L-85-149, an extension to June 30, 1987 was requested. However, upon re-evaluation, FPL is requesting extension of the inspection interval to February 11, 1988, as allowed in Section XI of the ASME Code.

Very truly yours,

J. W. Williams, Jr.
Group Vice President
Nuclear Energy
