Office of Nuclear Reactor Regulation
Attention: Mr. Frank J. Miraglia, Director
Division of PWR Licensing - B
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Miraglia:

Re: St. Lucie Unit No. 2
Docket No. 50-389
10 CFR 50.61(b)(1) Report

Florida Power and Light Company Letter (L-86-25), dated January 23, 1986, provided the projected values of RT (PTS) in accordance with the requirements of 10 CFR 50.61(b)(1). In the cover letter, it was stated that the highest RT (PTS) expected at St. Lucie Unit 2 is 171°F at the end of the operating license. This 171°F was a typographical error, and the correct number is 179°F, as shown in the tables attached to our January 23, 1986 letter. All other information presented in the letter and the attachments is correct. We hope you were not inconvenienced by this error.

Very truly yours,

C. O. Woody
Group Vice President
Nuclear Energy
