

MAY 18 1986

Docket No. 50-335

Florida Power & Light Company  
ATTN: Mr. J. W. Williams, Jr.  
Group Vice President  
Nuclear Energy  
P.O. Box 14000  
Juno Beach, FL 33408

Gentlemen:

Your submittal of November 8, 1985 provided a confirmatory reanalysis (Report No. XN-NF-85-85) of the steam line break event that considers asymmetric thermal-hydraulic and neutronic system behavior for St. Lucie Unit No. 1. It is our understanding that Amendment No. 63 to License No. DPR-67 acknowledged your agreement to provide this reanalysis. The ONRR staff has determined that this report needs to be reviewed for acceptability. This is based on your reanalysis demonstrating a higher return to power than the previously presented analysis. Therefore, it is subject to the fee provisions of 10 CFR 170.

It is requested that your Company remit the required application fee of \$150 to our office for the reanalysis. Your Company will be billed for any additional costs for the review of it in accordance with 10 CFR 170.12(c) and 170.21.

Sincerely,

Original Signed by:  
Reba M. Diggs
