Office of Nuclear Reactor Regulation
Attention: Mr. E. G. Tourigny, Project Manager
PWR Project Directorate #8
Division of PWR Licensing - B
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Tourigny:

Re: St. Lucie Plant
Docket No. 50-389
Safety Assessment System (SAS)

As per your request (E.G. Tourigny to C. O. Woody, dated June 9, 1986), FPL is providing a completion schedule for the SAS.

Subsequent to the May 20, 1986 meeting in Bethesda with representatives of the NRC and FPL staff, an independent re-evaluation of the SAS system has been conducted. Vendor programs of system enhancements, potentially involving hardware and software change-outs, are now being considered. A specification is currently being prepared to support this change-out which will be used as a basis for securing vendor bid proposals. Preliminary schedules indicate that FPL will be able to meet the December 31, 1987 commitment date for completion of the SAS system which was verbally discussed by the FPL staff in the May 20 meeting.

While the changes to the SAS system are being made, care will be taken to ensure that the SPDS system will remain in service with as few interruptions as possible. Additionally, FPL will periodically update the NRC on the status of completion of this project.

If you have any questions, please contact us.

Very truly yours,

C. O. Woody
