FLORIDA POWER & LIGHT COMPANY

OCTOBER 31 1986

L-86-443

Office of Nuclear Reactor Regulation
Attention: Mr. Ashok C. Thadani, Director
PWR Project Directorate #8
Division of PWR Licensing-B
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Thadani:

Re: St. Lucie Units 1 and 2
Docket Nos. 50-335 and 50-389
Administrative Review of St. Lucie Plant,
Units 1 and 2 Technical Specifications

By letter dated August 28, 1986 (E. G. Tourigny to C. O. Woody), the NRC identified areas in the Technical Specifications for both units which referred to outdated requirements or areas which may require clarification. The NRC requested that Florida Power & Light Company (FPL) comment on these items and provide potential amendment submittal dates to rectify/clarify these issues.

FPL is reviewing the issues identified in the August 28, 1986 letter and other company-identified enhancements to the Technical Specifications for both units. Some of the issues identified by the staff are being addressed in upcoming amendment requests (e.g. snubber tables). FPL currently plans to address these and other administrative Technical Specification issues by March 31, 1987.

Additionally, as a result of reviews of both units' Technical Specifications, we have found an administrative error in a license amendment previously issued. For Amendment 17 issued September 8, 1977 for St. Lucie Unit 1, page 3/4 9-3 is included in the amendment as an amended page when, in actuality, only the overleaf page, page 3/4 9-4, was amended. Page 3/4 9-3 continues to be an original page. FPL has taken administrative action to correct this administrative error.

Please contact us if you have any questions on this topic.

Very truly yours,

C. O. Woody
for C. O. Woody
Group Vice President
Nuclear Energy
