Office of Nuclear Reactor Regulation
Attention: Mr. E. G. Tourigny, Project Manager
PWR Project Directorate #8
Division of PWR Licensing - B
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Tourigny:

Re: St. Lucie Unit No. 2
Docket No. 50-389
Turbine Disc Inspection

On September 20, 1984, NRC issued a Safety Evaluation approving the St. Lucie Unit No. 2 low-pressure (LP) turbine disc inspection intervals of 3.49 years and 3.12 years for LP 1 and LP 2, respectively. During the last refueling outage (Spring 1986), the turbine rotors were replaced with Westinghouse Heavy Disc Keyway Plate (HD/KP) rotors. Westinghouse has recommended inspection intervals of 5 years of power operation for HD/KP rotors, and St. Lucie Unit No. 2 will be inspecting these rotors per Westinghouse's recommendation. It will continue to be FPL's policy to inspect the rotors in accordance with the manufacturer's recommendations.

If you have any questions concerning this information, please contact us.

Very truly yours,

C. O. Woody
Group Vice President
