L-87-52

U. S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, D. C. 20555

Gentlemen:

Re: St. Lucie Units 1 and 2
Docket Nos. 50-335 and 50-389
Generic Letter 86-06

By letter L-86-325, dated August 6, 1986, Florida Power & Light Company (FPL) endorsed the Combustion Engineering Owners Group (CEOG) reactor coolant pump trip criterion methodology (i.e., trip-two/leave-two staggered reactor coolant pump trip). In that same letter, FPL informed the NRC of the date by which the plant-specific information in response to Generic Letter 86-06 (GL 86-06), items 1, 3 and 4 would be submitted to the staff. FPL also committed to provide a schedule for the submittal of information concerning instrumentation uncertainties (i.e. GL 86-06, item 2).

CEOG has developed a schedule for submitting the instrumentation uncertainties information, and FPL has improved on the earlier schedule submitted to the staff for providing the GL 86-06 plant-specific information. As a result, FPL and the CEOG plan to submit to the staff all information required by GL 86-06 by June 30, 1987. This schedule has been found acceptable by the NRC Project Manager.

If you have any questions about this information, please contact us.

Very truly yours,

C. O. Woody
Group Vice President
Nuclear Energy
