L-87-92

U. S. Nuclear Regulatory Commission  
Attn: Document Control Desk  
Washington, D. C. 20555

Gentlemen:

Re: St. Lucie Unit I  
Docket No. 50-335  
Second Ten-Year Inservice Inspection Interval

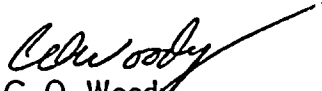

By letter L-85-431 dated November 13, 1985, Florida Power & Light Company (FPL) requested NRC approval to extend the first ten-year inspection interval for St. Lucie Unit I to February 11, 1988. By letter dated November 20, 1985 (Denton to Williams), the NRC Staff approved the extension, and as a result, the second ten-year inservice inspection interval for St. Lucie Unit I will begin on February 11, 1988 and end on February 11, 1998.

Pursuant to 10 CFR 50.55a(g)(4)(ii), applicable Code Edition and Addenda for the second ten-year inspection interval is the 1983 Edition through the Summer 1983 Addenda of Section XI, ASME Boiler and Pressure Vessel Code.

FPL is developing the second ten-year inservice inspection summary program for St. Lucie Unit I and plans to submit this summary program to the staff, along with necessary technical specification change proposals, in August 1987.

If you have any questions concerning the above, please contact us.

Very truly yours,

  
C. O. Woody  
Group Vice President  
Nuclear Energy
