MARCH 12 1987
L-87-115

U. S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, D. C. 20555

Gentlemen:

Re: St. Lucie Unit I
Docket No. 50-335
Operating License Expiration Date

By letter L-86-66, dated February 28, 1986, Florida Power & Light Company (FPL) proposed to extend the date of expiration of the St. Lucie Unit I operating license so that the forty year term of the license begins with the issuance of the operating license rather than the date of issuance of the construction permit. The expiration date of the operating license of St. Lucie Unit I would be extended from July 1, 2010 to March 1, 2016.

By letter dated February 4, 1987 (E. G. Tourigny to C. O. Woody), the NRC identified additional information, concerning the environmental effects of the transportation of fuel and waste, the staff requires to continue its review of the proposed license amendment. The staff requested FPL's response by March 11, 1987. FPL will be required to conduct additional analyses to address the staff's request for additional information. The nature of the request and the research required to prepare and run the analyses will not support a March 11, 1987 response. FPL will respond to this staff request by April 17, 1987. This schedule has been discussed with the NRC Project Manager.

Very truly yours,

C. O. Woody
Group Vice President
Nuclear Energy
