**RE: Notification of Corporate Restructuring and Change in Name;
Guardian Industries Corp., NRC Materials License No. 21-32217-01**

To Whom It May Concern:

This letter is in connection to Guardian Industries Corp.'s glass manufacturing facility located in Carleton, Michigan. The facility currently operates under U.S. Nuclear Regulatory Commission (NRC) Materials License No. 21-32217-01, which authorizes the facility to use one TN Technologies Model 5204 gauging unit. I am writing to provide your office with notice of a change to the corporate structure and name of Guardian Industries Corp. and to notify your office that the restructuring does not constitute a change of control. This letter also serves as a request for an amendment to NRC Material License No. 21-32217-01 to change the name on the permit to the new name of Guardian Industries, LLC.

By way of background, on February 1, 2017, Koch Industries, Inc. went from a minority shareholder to acquiring all the shares in Guardian Industries Corp., thereby indirectly becoming the sole shareholder of the company. This action did not change any of the officers or directors of Guardian Industries Corp.; did not affect the operation of any of Guardian Industries Corp.'s facilities, including its facility in Carleton, Michigan; and did not affect in any way the facility's use of the unit subject to the NRC license.

On August 1, 2017, Guardian Industries Corp. converted from a corporation to a limited liability company pursuant to Delaware's Limited Liability Act, and thereby changed its name to Guardian Industries, LLC. In addition, Guardian Industries, LLC (formerly Guardian Industries Corp.) became a direct subsidiary of a new company, Guardian Glass, LLC, which itself is an indirect wholly owned independently operated subsidiary of the current ultimate parent, Koch Industries, Inc. Guardian Industries, LLC will have the same officers and directors as Guardian Industries Corp., and the company's Tax ID remains the same. Further, these changes will not affect the operation of the Carleton facility, and, more specifically, will not affect the personnel responsible for or the programs governing the

RECEIVED AUG 07 2017

facility's use of the unit subject to the NRC license. Guardian Industries, LLC will continue to comply with the terms and conditions of the NRC Materials License.

Please confirm receipt of this letter and amendment request for NRC Material License No. 21-32217-01. Should you have any questions or need more information to process the name change, please contact Mike Boucher, the Radiation Safety Officer at the Carleton location, at the phone number (734) 654-4261.

Sincerely,

Gerald Hool
Plant Manager
