Subject: Fort St. Vrain Biennial Summary
Date: Wednesday, July 19, 2017 3:40:00 PM

Fort St. Vrain (FSV) submitted its 10 CFR 72.48 biennial report pursuant to 10 CFR 72.48(d)(2) on June 1, 2017 (I received the e-mail on June 8, 2017). As part of the Fort St. Vrain Safety Analysis Update Report, Docket 72-0009, the 72.48 biennial summary was included. It listed one 72.48 change which was a facility upgrade project to install a new perimeter intrusion detection and assessment system. The result was that all eight of the 72.48 criteria questions were answered "No".

No technical review disciplines were needed to review the summary. The recommendation is that no follow-up inspection is warranted.
