JUNE 30 1987  
L-87-276

U. S. Nuclear Regulatory Commission  
Attn: Document Control Desk  
Washington, D. C. 20555

Gentlemen:

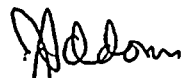

Re: St. Lucie Unit 2  
Docket No. 50-389  
Inservice Testing of Certain Safety-Related Pumps

In the March 4, 1987, appeal meeting concerning the Florida Power & Light Company (FPL) request for relief from performing quarterly flow measurements as specified in the ASME Boiler and Pressure Vessel Code, the NRC requested that FPL provide the NRC with an enhanced technical evaluation addressing the impracticality of performing flow measurements. By letter L-87-134, dated March 23, 1987, FPL stated that the current plan was to submit this evaluation to the NRC by early June 1987.

The purpose of this letter is to inform the NRC that FPL intends to submit the technical evaluation by July 31, 1987.

If there should be any questions regarding this subject, please contact us.

Very truly yours,

*for*   
C.O. Woody  
Group Vice President  
Nuclear Energy
