B.1 NRCB010 BRIEF PROJECT TITLE AND WORK DESCRIPTION

(a) The title of this project is:

Radium Program Technical Support

(b) Summary work description:

The objective of this acquisition is to: obtain expert technical assistance services to assist and support the NRC in determining the current radiological status of sites where byproduct material (specifically, discrete sources of radium-226) was historically used, or suspected to be used historically, for commercial, medical, research, or military activities.

For non-military sites, this shall be accomplished by assisting NRC in researching potential sites where radium was used and conducting initial site visits and follow-on scoping surveys. Further assistance to NRC shall be provided by documenting the results of these initial site visits and follow-on scoping surveys, and confirmatory surveys. These results will aid the NRC in determining whether additional controls are needed at each site, and if remediation of the site is needed.

For military sites to be transferred for future non-military use, this will be accomplished by assisting NRC in reviewing portions of clean-up plans, final status survey reports, performing confirmatory surveys, and side-by-side in-process surveys.

B.2 OBLIGATION OF FUNDS

This BPA does not obligate any funds. The Government is obligated only to the extent of authorized orders (BPA Calls) actually issued under the BPA by the Contracting Officer.

B.3 PRICE/COST SCHEDULE

Services Provided Under GS-00F-195CA (In Accordance with the Contractor Teaming Arrangement – Attachment 1)
