SUBJECT
University of Missouri; Response to RAI's relating to Pickard Hall Site Characterization Plan (ML15106A640)

SUMMARY

The NRC submitted to the licensee Requests for Information (RAI) on July 9, 2015 (ML15191A090) and June 30, 2016 (ML16183A395) via conversation records. In response to one of the RAI's, the licensee submitted procedures from a consultant which were listed as "Business Confidential." However, the documents were unable to be processed by NRC as the licensee did not demonstrate whether the "Confidential" documents were eligible to be withheld under 10 CFR 2.390.

The NRC provided guidance to the licensee to properly determine and document "confidential" documents through guidance obtained through NUREG 1556, Volume 1 "Consolidated Guidance About Materials Licenses - Program-Specific Guidance About Licenses of Broad Scope," Appendix R and other areas within the NUREG. The NRC also referred to license processes where, with the proper administrative controls approved by the NRC, the licensee could develop procedures which could be modified by the licensee during characterization planning.

The licensee committed to providing the NRC a path-forward concerning procedures required by 10 CFR 30.36((g) prior to characterization of the Pickard Hall requiring a Decommissioning Plan.
