Gentlemen:

SUBJECT: NOTICE OF VIOLATION
(NRC INSPECTION REPORT NOS. 50-335/89-02 AND 50-389/89-02)

This refers to the Nuclear Regulatory Commission (NRC) inspection conducted by P. J. Fillion on January 23-27, 1989. The inspection included a review of activities authorized for your St. Lucie facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed Inspection Report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The inspection findings indicate that certain activities appeared to violate NRC requirements. The violation, references to pertinent requirements, and elements to be included in your response are described in the enclosed Notice of Violation.

Your attention is invited to the unresolved item identified in the inspection report. This matter will be pursued during future inspections.

The enclosed Inspection Report documents several oral commitments (see paragraph 2.c) made by licensee representatives and discussed in the exit interview. If your understanding of these commitments differs from the report statements, please inform this office promptly.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

The responses directed by this letter and its enclosures are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.
