Name: Thomas Newton

General Comment

4

It is unfortunate that the non-power reactor community was not included in consideration of this RIS. It and other associated regulatory documents are being applied to NPRs, despite requirements under 104(c) of the Atomic Energy Act that NRC only promulgate the minimum amount of regulation required to assure the health and safety of the public. This has not been the case for NRC oversight of digital upgrades at NPRs and is not addressed in any versions of the RIS.
