Juno Beach, FL 33408-0420

Gentlemen:

SUBJECT: NRC INSPECTION REPORT NOS. 50-335/89-13 AND 50-389/89-13

The NRC Systematic Assessment of Licensee Performance (SALP) has been completed for your St. Lucie facility. The facility was evaluated for the period November 1, 1987 through April 30, 1989. The results of the evaluation are documented in the enclosed Interim SALP Report. This report will be discussed with you at a public meeting to be held at the St. Lucie facility on July 18, 1989, at 10:00 a.m.

The performance of your St. Lucie facility was evaluated in the functional areas of Plant Operations, Radiological Controls, Maintenance/Surveillance, Emergency Preparedness, Security, Engineering/Technical Support, and Safety Assessment/Quality Verification. Although the functional areas evaluated during this assessment period are not identical to those in the previous period, a close correlation can be made for identifying changes in performance. The ratings were essentially unchanged from the previous assessment period with an improving trend noted in the area of Radiological Controls.

Overall performance of the St. Lucie facility was excellent during this assessment period and your staff should be commended for achieving this high level of performance. However, there is still room for improvement in several of the rating categories and we encourage you to pursue these with added attention to detail.

Any comments you have concerning our evaluation of the performance of your St. Lucie facility should be submitted to this office within 30 days following the date of our meeting. These comments will be considered in development of the Final SALP Report. Your comments and a summary of our meeting will be issued as an appendix to the Final SALP Report.

Should you have any questions concerning this letter, we will be glad to discuss them with you.

Sincerely,

Original signed by
