DECEMBER 13 1989

L-89-455

U. S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, D. C. 20555

Gentlemen:

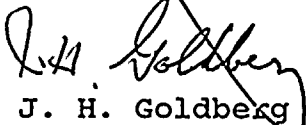

Re: St. Lucie Units 1 and 2
Docket Nos. 50-335 and 50-389
NUREG-0737 Item II.D.1, Performance Testing of
Relief and Safety Valves (TAC Nos. 44617 and 51605)

By NRC letter and Safety Evaluation (SER) dated May 11, 1989, the Staff approved Florida Power & Light Company's (FPL) submittal in response to the subject TMI Action Plan requirement with the exception of the items outlined in Section 5.2 of the Technical Evaluation Reports which were attached the NRC SER. The Staff requested FPL to provide the NRC Project Manager a schedule for the resolution of Items 7 and 8 for St. Lucie Unit 1 and Item 8 for St. Lucie Unit 2, as outlined in the SER. Per letter L-89-225 dated June 23, 1989, FPL notified the NRC that technical resolution of these items for St. Lucie Units 1 and 2 would be completed by December 15, 1989.

FPL has completed Item 7 for St. Lucie Unit 1. The documentation of the resolution of this item will be maintained at the St. Lucie plant site for NRC audit as requested in the NRC SER. Additionally, FPL has determined that significant additional analytical work, in addition to that completed subsequent to receipt of the NRC May 11, 1989 SER, will be required to fully address Item 8 for both St. Lucie Unit 1 and Unit 2. FPL's completion schedule for this additional work is August 1990.

Should there be any questions regarding this subject, please contact us.

Very truly yours,

J. H. Goldberg

Executive Vice President

JHG/MSD/gp
