Gentlemen:

Re: St. Lucie Unit 1
Docket No. 50-335
Proposed License Amendment
Steam Generator Sleaving (TAC No. 73328)

By letter L-89-140, dated May 3, 1989, Florida Power & Light Company (FPL) proposed to amend the St. Lucie Unit 1 Technical Specifications to permit repair of steam generator tubes by the installation of either Westinghouse or Combustion Engineering mechanical sleeves. In a telephone conversation on June 2, 1989, the NRC stated that it found the subject license amendment generally acceptable. Subsequent to the June 2, 1989, telephone conversation, FPL and the NRC have held several discussions on the format and content of the revised Technical Specifications. As a result of these discussions, FPL proposes the attached revised Technical Specifications for the subject proposed license amendment. The attachment supersedes the proposed marked-up Technical Specifications of Attachment 1 to FPL's L-89-140 letter.

If you have further questions on this topic, please contact us.

Very truly yours,

J. H. Goldberg
Executive Vice President

JHG/EJW/tbj
