March 9, 1990

Director - Office of Inspection & Enforcement
US Nuclear Regulatory Commission
Washington, DC 20555

Subject: 10 CFR 21 Reportable Incident

Reference: Anchor/Darling Valve Company letter dated January 26, 1990

Gentlemen:

The above referenced letter (copy attached) identified a potential problem and listed plant sites that have been supplied with our actuator which incorporate the use of Teldyne-Republic four-way valves. We inadvertently left off the following three sites:

- Northeast Utilities
Milestone 3
- Florida Power & Light
St. Lucie 2
- Georgia Power Company
Vogtle 1 & 2

These sites were, however, notified of the problem at the same time as the other sites (see letters attached).

Please excuse the oversight.

Sincerely,

W. G. Knecht

WGK/jf
