SEPTEMBER 27 1990

L-90-351  
10 CFR 50.90

U. S. Nuclear Regulatory Commission  
Attn: Document Control Desk  
Washington, D. C. 20555

Gentlemen:

Re: St. Lucie Units 1 and 2  
Docket Nos. 50-335 and 50-389  
Proposed License Amendments  
Organizational Titles

By letter L-90-313, dated August 27, 1990, Florida Power & Light Company (FPL) submitted a request to amend Facility Operating Licenses DPR-67 and NPF-16 for St. Lucie Units 1 and 2, respectively. These amendments would revise Section 6.0, Administrative Controls, by adding more general organizational titles and correcting a typographical error.

Subsequent to FPL's submission of these proposed amendments, the NRC staff requested that FPL define in the body of the Technical Specifications the controlled document in which FPL will define "Senior Corporate Nuclear Officer". As a result, FPL proposes to revise page 6-1 of both units' Technical Specifications, as attached. The balance of the proposed license amendments remain proposed, as submitted. FPL has reviewed the "Determination of No Significant Hazards Consideration" included as Attachment 4 to L-90-313 and has determined that it remains an appropriate determination.

The proposed revisions have been reviewed by the St. Lucie Plant Facility Review Group.
