L-90-404
10 CFR 50.46

U. S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, DC 20555

Gentlemen:

Re: St. Lucie Units 1 and 2
Docket Nos. 50-335 and 50-389
10 CFR 50.46, "Acceptance Criteria for
Emergency Core Cooling Systems In Light
Water Nuclear Power Reactor" - Annual Report

Florida Power & Light Company (FPL) reports per 10 CFR 50.46 (a)(3)(ii) that there were no changes to or errors discovered in the Emergency Core Cooling System (ECCS) limiting transient models for St. Lucie Unit 1 or St. Lucie Unit 2, for the period October 17, 1989, through October 16, 1990. The ECCS limiting transient analysis supplier for St. Lucie Unit 1 is Advanced Nuclear Fuels. The ECCS limiting transient analysis supplier for St. Lucie Unit 2 is Combustion Engineering.

Currently, the annual FPL 10 CFR 50.46 report is being submitted by November 16th of each year. FPL will provide a report for the period between October 17, 1990, and December 31, 1990 in March 1991. Thereafter, the FPL ECCS annual reporting requirement under 10 CFR 50.46 will be based on an end-of-calendar year and will be submitted to the NRC in March of each year. This change has been discussed with the St. Lucie Plant NRC Project Manager.

Should there be any questions, please contact us.

Very truly yours,

D. A. SAGER
