Re: St. Lucie Units 1 and 2
Docket Nos. 50-335 and 50-389
Confirmatory Measurements Program

During a routine NRC Region II inspection in March 1991, Mr. R. Marston discussed the results of the St. Lucie Confirmatory measures split sample of October 1, 1990. Mr. Marston indicated that the results were not satisfactory for two out of the four analyzed nuclides.

St. Lucie contacted the off-site vendor that performs the Iron-55 and Strontium-90 testing for the St. Lucie Plant, and the vendor indicated that they did not have a sufficient quantity of the original sample remaining to perform a follow-up analysis for these two nuclides.

Please provide an additional sample for the Iron-55 and Strontium-90 analysis.

Should there be any additional information needed, please contact us.

Very truly yours,

D. A. Sager
Vice President
St. Lucie Plant
