Dear Mr. Goldberg:

SUBJECT: USE OF CODE CASE N-468, ST. LUCIE, UNITS 1 AND 2 AND TURKEY POINT,  
UNITS 3 AND 4 (TAC NOS. 76114, 76115, 76116 AND 76117)

By letter dated February 27, 1990, the Florida Power and Light Company requested NRC staff approval for the use of ASME Code Case N-468, "Alternate Method of Earthquake Description for Class 2 and 3 Piping at Low Seismicity Sites."

NRC Regulatory Guide 1.84, "Design and Fabrication Acceptability ASME Section III, Division 1" lists the ASME Code Cases that have been endorsed by the staff for use with respect to the design, fabrication, installation and testing of Class 1, 2, and 3 components. The staff reviewed Code Case N-468 and concluded that sufficient bases did not exist to endorse Code Case N-468 for inclusion into the Regulatory Guide. As such, the requested application of Code Case N-468 to St. Lucie, Units 1 and 2, and Turkey Point, Units 3 and 4, is not approved. Consequently, we are closing TAC Nos. 76114, 76115, 76116 and 76117.

Sincerely,

(Original Signed By)

Rajender Auluck, Sr. Project Manager  
Project Directorate II-2  
Division of Reactor Projects - I/II  
Office of Nuclear Reactor Regulation

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This ensures transparency and allows for easy verification of the data.

In the second section, the author details the various methods used to collect and analyze the data. This includes both manual and automated processes. The goal is to ensure that the information is both reliable and up-to-date.

The third section focuses on the challenges faced during the data collection process. These include issues such as incomplete records, inconsistent formatting, and the need for regular updates. The author provides several strategies to overcome these challenges, such as implementing standardized procedures and using data validation tools.

Finally, the document concludes with a summary of the findings and a list of recommendations. It stresses the importance of ongoing monitoring and review to ensure that the data remains accurate and relevant over time.
