

RBS USAR

CHAPTER 16

TECHNICAL SPECIFICATIONS

The technical specifications are provided under separate cover.

Section 16.1 - TSTF based Commitments

Section 16.2 - System Mission Times

## 16.1 - TSTF based Commitments

The following are commitments required by amendments based upon standards TSTFs.

TSTF Number	Commitment	Notes
	As discussed in the notice of availability published in the Federal Register for these TS improvements, plant-specific regulatory commitments are made.	
423		As approved by the NRC in Amendment 185.
	(Entergy will follow the guidance of) NUMARC 93-01 Section 11, which provides guidance and details on the assessment and management of risk during maintenance.	Entergy has previously committed to this guidance as included in the application for TSTF-427 and approved by the NRC in Amendment 173, therefore, no new commitment is required.
	Entergy will follow the guidance established in TSTF-IG-05-02 "Implementation Guidance for TSTF-423, Revision 2, Technical Specification End States, NEDC-32988-A."	

## 16.2 - System Mission Times

System mission times are contained in Design Criteria 245.600, Operability Time for Class 1E Equipment.
