

ENCLOSURE 1

NOTICE OF VIOLATION

Florida Power & Light Company  
St. Lucie 1

Docket No. 50-335  
License No. DPR-67

During an NRC inspection conducted on December 23, 1991 to January 27, 1992, a violation of NRC requirements was identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," 10 CFR Part 2, Appendix C (1991), the violation is listed below:

Unit 1 technical specification (TS) 6.8.1.a requires that written procedures shall be established, implemented, and maintained covering the activities recommended in Appendix A of Regulatory Guide 1.33, Revision 2, February 1978. Appendix A, paragraph 1 includes procedures for equipment control and for log entries. This was implemented on site in part by OP 0010129, Rev 18, Equipment Out-Of-Service, which required that all equipment required by TS shall be logged in the Equipment Out-of-Service Log when that equipment has been determined to be inoperable.

TS 3.8.1.1.a. requires that, while in Modes 1 - 4, two physically independent circuits between the offsite transmission network and the onsite Class 1E distribution system be operable.

Contrary to the above, on December 23, 1991, while in Mode 1, licensee operators made the A-train physically independent circuit between the offsite transmission network and the onsite Class 1E distribution system inoperable by racking out the 1A startup transformer circuit breaker and removing it, without declaring the A-train offsite circuit inoperable or logging the condition in the Equipment Out of Service Log.

This is a Severity Level IV violation (Supplement I).

Pursuant to the provisions of 10 CFR 2.201, the Florida Power & Light Company is hereby required to submit a written statement or explanation to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, D.C. 20555, with a copy to the Regional Administrator, Region II, and if applicable, a copy to the NRC Resident Inspector, within 30 days of the date of the letter transmitting this Notice of Violation (Notice). This reply should be clearly marked as a "Reply to a Notice of Violation" and should include for each violation: (1) the reason for the violation, or, if contested, the basis for disputing the violation, (2) the corrective steps that have been taken and the results achieved, (3) the corrective steps that will be taken to avoid further violations, and (4) the date when full compliance will be achieved. If an adequate reply is not received within the time specified in this Notice, an order may be issued to show cause why the license should not be modified, suspended, or revoked or why such other action as may be proper should not be taken. Where good cause is shown, consideration will be given to extending the response time.

Dated at Atlanta, Georgia  
this 25th day of February, 1992.
