Docket Nos. 50-335, 50-389
License Nos. DPR-67, NPF-16

Florida Power and Light Company
ATTN: Mr. J. H. Goldberg
President - Nuclear Division
P.O. Box 14000
Juno Beach, FL 33408-0420

Gentlemen:

Subject: SYSTEMATIC ASSESSMENT OF LICENSEE PERFORMANCE
(NRC INSPECTION REPORT NOS. 50-335/92-06 AND 50-389/92-06)

The NRC Systematic Assessment of Licensee Performance (SALP) has been completed for your St. Lucie facility. The facility was evaluated for the period November 1, 1990, through May 2, 1992. The results of the evaluation are documented in the enclosed Initial SALP Report. This report will be discussed with you at a public meeting to be held at the St. Lucie facility on June 30, 1992, at 10:00 a.m.

The performance of your St. Lucie facility was evaluated in the functional areas of Plant Operations, Radiological Controls, Maintenance/Surveillance, Emergency Preparedness, Security, Engineering/Technical Support, and Safety Assessment/Quality Verification.

The assessment indicates that St. Lucie continued, and improved upon, its history of superior performance. The assessment assigned superior performance ratings to the facility in all of the SALP functional areas, a condition that is rarely achieved by a nuclear power plant.

This level of performance can only be achieved by teamwork at all levels and a dedication to excellence by everyone associated with the facility. It is indicative of proactive senior management setting high standards of safety performance and providing the resources necessary to achieve those standards.

We commend you and your entire staff for this truly superior performance.

Any comments you have concerning our evaluation of the performance of your St. Lucie facility should be submitted to this office within 30 days following the date of our meeting. These comments will be considered in the development of the Final SALP Report. Your comments and a summary of our meeting will be issued as an appendix to the Final SALP Report.
