Re: Changes in NRC Material License No. 13-32079-01
Additional Information

To Whom It May Concern:

On July 10, 2017, during a phone conversation with Laura Cender of the NRC, clarification on the following three items was requested before finalizing Andrews Engineering, Inc.'s submitted Request to Changes in NRC Material License No. 13-32079-01.

1. The originally submitted documentation contains leak test results for one Troxler nuclear density gauge, which is the only device that was stored at our previous location of 7172 Graham Road, Suite 125 Indianapolis, Indiana 46250.
2. We respectfully request that our name of record be changed from Andrews Environmental Engineering, Inc. to Andrews Engineering, Inc.
3. We respectfully request to withdraw the Operating and Emergency Procedures contained in Attachment 7 of our original May submittal.

We appreciate your consideration of these matters. Please do not hesitate to contact me should you require any further information.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael P. McConnell", is written over a white background.

Michael P. McConnell
Radiation Safety Officer

Subject: Andrews Engineering, Inc. License Amendment - Additional Information Requested

Hello Stephanie,

Thank you for taking time out of your afternoon to speak with me. Per our conversation please address the following items:

1. Please confirm that the Troxler Gauge with S/N 23404 referenced in your cover letter and for which a leak test was provided with your application was the only gauge stored at your 7172 Graham Road facility. Additionally, please confirm that the device has no known history of leaking. If there have been additional licensed devices stored at this facility please confirm they have been removed and also provide a copy of their most recent leak test.
2. Please confirm that the company name on your license should be changed to Andrews Engineering, Inc. and that this is a request for a name change only and is not resulting from a sale of the company or other action that would result in a change of control of the company's operations including the radiation safety program.
3. Please confirm that you wish to withdraw Attachment 7 "Operating and Emergency Procedures" from your amendment application.

Please send your response with a signature and date, and please submit your response no later than 7/21/2017. Please let me know if you will need additional time beyond this date.

If you have any questions please feel free to reach me at 630-829-9712.

Thank you,
Laura Cender
