

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

February 5, 1993

Docket Nos. 50-335, 50-389

Mr. J. H. Goldberg  
President - Nuclear  
Florida Power and Light Company  
P. O. Box 14000  
Juno Beach, Florida 33408-0420

Dear Mr. Goldberg:

On January 26-28, 1993, NRC senior managers met to evaluate the nuclear safety performance of operating reactors, fuel facilities, and other materials licensees. The NRC conducts this meeting semiannually to determine if the safety performance of the various licensees exhibits sufficient weaknesses to warrant increased NRC attention. In addition, at this meeting, senior managers identify specific plants that have demonstrated a level of safety performance that deserves formal NRC recognition. At the January 1993 Senior Management Meeting, the St. Lucie nuclear power plant (Units 1 and 2) was identified as having achieved a high level of safety performance and as a result met criteria for recognition of its performance. I am pleased to note that St. Lucie has again been identified as a good performer.

In identifying such plants, NRC senior managers perform an evaluation of performance in many areas including operational safety, self-assessment, problem resolution, and plant management organization and oversight.

The NRC recognizes that to achieve the level of performance demonstrated by the St. Lucie nuclear power plant, there must be management involvement in all phases of plant activities, the staff must be dedicated and knowledgeable and fully supportive of plant activities, and a commitment to safety must exist throughout the organization. We commend you and your staff for achieving this high level of safety performance. Your achievement is a positive example to the industry.

The greatest challenge that you now face is to maintain this level of performance and not to rest on past achievements. Continued management involvement and support, and dedicated efforts from your staff to identify and
