RE: St. Lucie Unit 1
Docket No. 50-335
Withdrawal of Request for Proposed License Amendment

On December 17, 1992, Florida Power and Light Company (FPL) requested to amend Facility Operating License DPR-67 for St. Lucie Unit 1 with an interim change to the Incore Detection System operability requirements. The proposed changes to Technical Specifications 3.3.3.2 and 4.2.1.4.b.1 would have been effective from the date of issuance until April 30, 1993 to allow certain monitoring functions to be performed with a reduced number of operable incore detector locations for the remainder of fuel cycle 11.

Please be advised that St. Lucie Unit 1 successfully completed cycle 11 within the constraints of the presently specified operability requirements for the incore system. Accordingly, the request of December 17, 1992 (L-92-331) is hereby withdrawn.

Your patience and cooperation in this matter is appreciated.

Very truly yours,

D. A. Sager
Vice President
St. Lucie Plant
