

**SAFETY INSPECTION REPORT AND COMPLIANCE INSPECTION**

1. LICENSEE/LOCATION INSPECTED:  Decorative Panels International, Inc. 416 Ford Avenue Alpena, MI 49707  REPORT NUMBER(S) 2017001	2. NRC/REGIONAL OFFICE  Region III U. S. Nuclear Regulatory Commission 2443 Warrenville Road, Suite 210 Lisle, IL 60532-4352
---	---

3. DOCKET NUMBER(S)  030-04843	4. LICENSE NUMBER(S)  21-05856-01	5. DATE(S) OF INSPECTION  July 17 <sup>th</sup> 2017
--------------------------------------	---	--

**LICENSEE:**

The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Nuclear Regulatory Commission (NRC) rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are as follows:

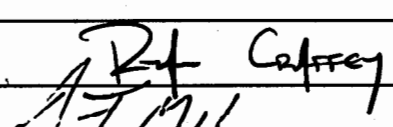

- 1. Based on the inspection findings, no violations were identified.
- 2. Previous violation(s) closed.
- 3. The violation(s), specifically described to you by the inspector as non-cited violations, are not being cited because they were self-identified, non-repetitive, and corrective action was or is being taken, and the remaining criteria in the NRC Enforcement Policy, to exercise discretion, were satisfied.

\_\_\_\_\_ Non-cited violation(s) were discussed involving the following requirement(s):

- 4. During this inspection, certain of your activities, as described below and/or attached, were in violation of NRC requirements and are being cited in accordance with NRC Enforcement Policy. This form is a NOTICE OF VIOLATION, which may be subject to posting in accordance with 10 CFR 19.11.  
(Violations and Corrective Actions)

**Statement of Corrective Actions**

I hereby state that, within 30 days, the actions described by me to the Inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.

Main Office Inspection                      Next Inspection Date:                      07/12/2022

Field Office Inspection \_\_\_\_\_

Temporary Job Site Inspection \_\_\_\_\_

**PROGRAM SCOPE**

This was an unannounced routine inspection of a solid hardboard manufacturing company authorized to use fixed nuclear gauges for process line measurements at its facility in Alpena, Michigan. At the time of the inspection, the licensee had three Canberra LS-101 gauges in operation, and three others (two Kay-Ray 7063 and one Ohmart SHRM) locked out of service in their original locations. The RSO oversaw the safe use of the gauges, assisted by one instrument technician.

**PERFORMANCE OBSERVATIONS**

The inspector toured the facility in Alpena to evaluate the licensee's measures for materials security, hazard communication and exposure control. The inspector found all of the licensee's gauges to be in good condition and suitably labeled and/or posted. None of the gauges had been subject to any incidents, events or mechanical failures since the last inspection. Independent surveys in the vicinity of these gauges were consistent with the applicable safety evaluations in the Sealed Source and Device Registry. No readings exceeded regulatory limits to members of the public. The inspector discussed with the RSO the licensee's procedures for leak testing, inventories, shutter checks, and lockout/tag-out procedures and emergency response. Through these discussions the inspector found the licensee's RSO to be knowledgeable of radiation protection principles and regulatory requirements.

The inspector also reviewed a selection of records, including leak test results, inventory and shutter check documentation, survey meter calibration records, and radiation safety training materials.

No violations of NRC requirements were identified as a result of this inspection.
