RE: St. Lucie Units 1 and 2  
Docket No. 50-335 and 50-389  
NRC Bulletin 88-11

By letter (J. A. Norris to J. H. Goldberg) dated June 29, 1993, NRC provided Florida Power and Light Company (FPL) a copy of the safety evaluation for Combustion Engineering Owners Group (CEOG) report CEN-387-P, revision 1, "Pressurizer Surge Line Thermal Stratification Evaluation." The above letter requested FPL to verify the applicability of the CEOG bounding analysis in CEN-387-P, revision 1 to St. Lucie and confirm that all the required actions requested by NRC Bulletin (NRCB) 88-11 are completed. The FPL response was requested within 60 days of receipt of the NRC letter.

The CEOG report CEN-387-P, revision 1, is applicable and bounds St. Lucie Units 1 and 2. Except for NRCB action item 1.d, updating of the plant specific stress and fatigue analyses, the actions requested in the bulletin are complete. NRCB action item 1.d is scheduled to be complete by January 31, 1994.

Please contact us if there are any questions.

Very truly yours,

  
D. A. Sager  
Vice President  
St. Lucie Plant
