RE: St. Lucie Units 1 and 2
Docket No. 50-335 and 50-389
Generic Letter 92-01, Revision 1
Request for Additional Information Schedule

On July 28, 1993, the NRC issued a request for additional Information (RAI) on the Florida Power and Light Company (FPL) response to Generic Letter 92-01, Revision 1, "Reactor Vessel Structural Integrity, 10 CFR 50.54(f)." The RAI requested a response or a schedule within 60 days of the letter date. FPL has reviewed the RAI and determined that a full response will not be available within the time requested. The data requested will require a review of fabrication records by the original equipment manufacturer (Combustion Engineering) as background for part of the response.

The response to the RAI is scheduled to be submitted by November 17, 1993.

Please contact us if there are any questions about this submittal.

Very truly yours,

D. A. Sager
Vice President
St. Lucie Plant
