Docket No. 50-389  
In-Service Inspection Plan  
Second Ten-Year Interval  
Request for Additional Information - Response

On August 4, 1993, Florida Power and Light Company (FPL) submitted an In-Service Inspection (ISI) Program Plan and Schedule for the second 10-Year in-service inspection interval. This submittal incorporated the requirements of the latest edition of ASME Section XI, to the extent practical, as endorsed by 10 CFR 50.55a(b). During the review process the NRC staff, with assistance from Idaho National Engineering Laboratory, determined that additional information was required in order to complete the review. By letter dated June 17, 1994, the NRC requested FPL to provide the information.

FPL has reviewed the NRC request for additional information and the response is enclosed. Please contact us if there are any questions.

Very truly yours,

D. A. Sager  
Vice President  
St. Lucie Plant
