RE: St. Lucie Units 1 and 2
Docket No. 50-335 and 50-389
Proposed License Amendments
Relocation of Selected Technical Specification Requirements Related to Instrumentation
and NRC Generic Letter 93-07 Line-Item Technical Specification Improvement

Pursuant to 10 CFR 50.90, Florida Power & Light Company (FPL) requests to amend Facility Operating Licenses DPR-67 and NPF-16 for St. Lucie Units 1 and 2. The proposed amendments revise St. Lucie Units 1 and 2 Technical Specifications to relocate selected Technical Specification Monitoring Instrumentation utilizing the Final Policy Statement on Technical Specification Improvement for Nuclear Power Reactors, 58 FR 39132, July 22, 1993. The proposed amendments also include relocation of Technical Specifications related to the Emergency and Security Plan review process utilizing the guidance contained in NRC Generic Letter 93-07, "Modification of the Technical Specification Administrative Requirements for Emergency and Security Plans." These proposed amendments will reduce the regulatory burden at St. Lucie Plant although they are not a Cost Beneficial Licensing Action as defined by the NRC. It is requested that the proposed amendments, if approved, be issued by June 1, 1996.

Attachment 1 is a marked up copy of the proposed Technical Specification changes. Attachment 2 is a Safety Analysis in support of the proposed amendments. Attachment 3 is the "Determination of No Significant Hazards Consideration."

The proposed amendments have been reviewed by the St. Lucie Facility Review Group and the Florida Power & Light Company Nuclear Review Board. In accordance with 10 CFR 50.91 (b)(1), a copy of the proposed amendments is being forwarded to the State Designee for the State of Florida.

Please contact us if there are any questions about this submittal.

Very truly yours,

D. A. Sager
Vice President
St. Lucie Plant
