SUBJECT: NRC EXAMINATION REPORT NOS. 50-335/96-300 AND 50-389/96-300

Gentlemen:

This refers to the Nuclear Regulatory Commission (NRC) administered examinations conducted during the period of March 11-28, 1996. The examinations were administered to employees of your company who had applied for licenses to operate the Saint Lucie Plant Units 1 and 2. At the conclusion of the examination, the examinations and preliminary findings were discussed with those members of your staff identified in the NRC Examination Report, Enclosure 1.

A Simulator Facility Report is included in this report as Enclosure 2. A copy of the written examination questions and answer key, as noted in Enclosure 3, was provided to members of your training staff at the conclusion of the examination. The facility provided no post comments regarding the written examination.

In October 1995, one candidate from your facility participated in and passed the Generic Fundamentals Examination.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

Should you have any questions concerning this examination, please contact us.

Sincerely,

ORIGINAL SIGNED BY T. A. PEEBLES
