SUBJECT: NRC INTEGRATED INSPECTION REPORT NOS. 50-335/97-10, 50-389/97-10
AND NOTICE OF VIOLATION.

Dear Mr. Plunkett:

On September 9, 1997, the NRC completed an inspection at your St. Lucie 1 and 2 reactor facilities. The enclosed report presents the results of that inspection.

Based on the results of this inspection, the NRC has determined that a violation of NRC requirements occurred. The violation related to NRC identified Updated Final Safety Analysis Report (UFSAR) discrepancies and is of concern because the inspectors concluded that the UFSAR inaccuracies would not have been identified by your UFSAR review effort.

This violation is cited in the enclosed Notice of Violation, and the circumstances surrounding the violation are described in detail in the enclosed report. Please note that you are required to respond to this letter and should follow the instructions specified in the enclosed Notice when preparing your response. The NRC will use your response, in part, to determine whether further enforcement action is necessary to ensure compliance with regulatory requirements.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room (PDR).

Sincerely,

Orig signed by Kerry D. Landis
