Re: St. Lucie Units 1 and 2  
Docket Nos. 50-335 and 50-389  
Technical Specification Special Report  
Date of Event: May 16, 1998  
Meteorological Tower Ten Meter  
Wind Speed Indicator Channel Out of Service

The attached Special Report is being transmitted pursuant to the requirements of St. Lucie Unit 1 Updated Final Safety Analysis Report (UFSAR) Section 13.8.1.3.1, St. Lucie Unit 2 UFSAR Section 13.7.1.3.1 and pursuant to Technical Specification 6.9.2. The report provides notification that the ten meter wind speed indicator channel was out of service for greater than seven (7) days and the plans for restoring the channel to service.

Should there be any questions on this information, please contact us.

Very truly yours,

J. A. Stall  
Vice President  
St. Lucie Plant

Re: St. Lucie Units 1 and 2  
Docket Nos. 50-335 and 50-389  
L-98-144 Attachment

**Technical Specification 6.9.2 Special Report**

On May 7, 1998 the St. Lucie meteorological tower ten meter wind speed indicator was declared out of service due to a loss of indication. It was returned to service on May 15, 1998 and on May 18, 1998, the ten meter wind speed indicator was again declared out of service for the same problem. Unit 1 UFSAR Section 13.8.1.3.1 Action 'b' and Unit 2 UFSAR Section 13.7.1.3.1 Action 'b' states that with a required meteorological channel out of service for greater than seven days, submit a special report to the NRC within the next ten days. As a compensatory measure, all releases of gaseous radioactive material from the radiological waste gas decay tanks at both units used the corrected 60 meter wind speed indicator.

The initial cause of the out of service time was determined to be a dirty connection on the ten-meter wind speed indicator instrument. The ten meter wind speed indicator was returned to service May 15, 1998. However, on May 18, 1998, the instrument lost indication again and was declared out of service. Later on May 18, 1998, the instrument and control technician troubleshooting the loss of indication found a loose ground wire for the ten meter wind speed indicator. The connection was tightened and all other connections were checked to be tight. Operation of the ten meter wind speed indicator was monitored for a few days with no problems, and the ten meter wind speed indicator was returned to service on May 21, 1998.

SUBJECT: MEETING ANNOUNCEMENT - EMERGENCY OPERATING PROCEDURE  
ISSUES - ST. LUCIE DOCKET NOS. 50-335, 50-389

Dear Mr. Plunkett:

This letter confirms the telephone conversation between Mr. E. Weinkam of your staff and Mr. S. Ninh of this office on January 6, 2000, concerning a management meeting which is being conducted at your request. The meeting has been scheduled for February 8, 2000, from 1:00 p.m. - 4:00 p.m. The purpose of the meeting is to discuss Emergency Operating Procedure issues at your St. Lucie facility.

The location of the meeting will be at the NRC Region II Office, 61 Forsyth Street, SW, Atlanta, Georgia 30303, in the Main Conference Room, Suite 24T20. This meeting is an open meeting as per "Staff Meetings Open to the Public; Final Policy Statement" (September 20, 1994; 59 FR 48340).

Should you have any questions concerning this meeting, please contact me at (404) 562-4540.

Sincerely,

( Original signed by L. Wert )
