AMENDMENT TO FACILITY OPERATING LICENSE

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of the Florida Power and Light Company (the licensee) to withdraw its June 21, 1995 application for proposed amendments to Facility Operating Licenses Nos. 50-335 and 50-389 for the St. Lucie Plant, Unit Nos. 1 and 2, located in St. Lucie County, Florida.

The proposed amendment would have revised the facility technical specifications pertaining to the time allowed for a single inoperable Emergency Diesel Generator to be returned to operable status.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the FEDERAL REGISTER on September 27, 1995 (60FR49936). However, by letter dated December 15, 1998, the licensee withdrew the proposed changes.

For further details with respect to this action, see the application for amendments dated June 21, 1995, and the licensee's letter dated December 15, 1998, which withdrew the application for these license amendments. The above documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Indian River Junior College Library, 3209 Virginia Avenue, Fort Pierce, Florida 34954-9003.

Dated at Rockville, Maryland, this 22nd day of December 1998.
