SUBJECT: NRC INSPECTION REPORT NOS. 50-250/96-05, 50-251/96-05, 50-335/96-07,
AND 50-389/96-07

Dear Mr. Plunkett:

This refers to the inspection conducted from April 22 through May 3, 1996. The inspection included a review of activities authorized for your Turkey Point, St. Lucie and Juno Beach facilities. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The NRC encourages licensees to implement employee concerns programs and recognizes your positive initiatives to provide an effective, alternate means for employees to voice their concerns. Although we judged your programs to be effective at all three company locations (Turkey Point, St. Lucie, and the Corporate Office in Juno Beach), we determined that recent staffing reductions and a perceived lack of employee confidence associated with identity protection may have negative effects on your program in the future. Specifically, as described in the enclosed report and discussed in the St. Lucie exit meeting on May 3, 1996, weaknesses associated with implementation of Florida Power and Light Nuclear Policy NP-800 were noted.

Within the scope of this inspection, no violations or deviations were identified.

In accordance with 10 CFR 2.790(a), a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

Sincerely,

Johns P. Jaudon, Deputy Director
Division of Reactor Safety
