Subject: [External_Sender] Notification of Spill at Lost Creek
Date: Saturday, August 19, 2017 11:40:06 AM

John and Nancy,

At approximately 10:57 p.m. on 8/18/17, wellfield operators discovered a spill in Header House 6 on the IC circuit. The uranium grade is estimated to be 1.2 mg/l. The spill entered the drainage immediately downhill from the header house. Early estimates are that approximately 2,000 gallons of fluid was spilled outside the house; however, efforts to characterize the size of the spill more precisely are ongoing. The incident has been reported to Wyoming DEQ via the on-line reporting page. The assigned incident number is 170819-0936. Additional information will be provided in the written report
