

PREDECISIONAL ENFORCEMENT CONFERENCE SUMMARY

Licensee: Engineering & Inspections Hawaii, Inc.

Facility: Temporary Job Site – Dededo, Guam

License No.: 53-27731-01

Docket No.: 030-36017

EA-17-065

On July 31, 2017, representatives of Engineering & Inspections Hawaii, Inc. (E & I Hawaii) met with NRC personnel in the Region IV office in Arlington, Texas, to discuss the apparent violations identified in NRC Inspection Report Number 030-36017/2017-001. The conference was held at the request of the licensee.

The NRC presented an overview of the apparent violations and E & I Hawaii presented a summary of the causes for the apparent violations, their perspective on the apparent violations and their corrective actions. At least one of the apparent violations, the licensee's presentation, including corrective actions, involved security requirements in Title 10 of the *Code of Federal Regulations* (10 CFR) Part 37 and therefore are not publically available.

The corrective actions discussed during the conference included: (1) E & I Hawaii notifying the NRC Region IV office that they conducted radiographic operations or stored radioactive material at a location not listed on the license for more than 180 days in calendar years 2016 and 2017; and (2) E & I Hawaii requested an amendment to their license to include the location in Dededo, Guam as a Field Station which was issued July 3, 2017. The licensee stated that they disagreed with the requirements but agreed with the violations. The NRC representatives discussed options for the licensee to provide feedback to the NRC regarding the regulations.

The attendance list are attached to this summary.

In accordance with 10 CFR 2.390 of the NRC's "Agency Rules of Practice and Procedure," a copy of this summary and its enclosure will be made available electronically for public inspection in the NRC Public Document room or in the NRC's Agencywide Documents Access and Management System, accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.
