Commonwealth Edison Company  
 ATTN: Mr. L. D. Butterfield, Jr.  
 Nuclear Licensing Administrator  
 Post Office Box 767  
 Chicago, Illinois 60690

Gentlemen:

In letters of May 31, 1972, from H. K. Hoyt to T. R. Wilson and of June 3, 1972, from W. P. Worden to E. J. Bloch, you reported that programs are underway to investigate and improve the performance of the Dresden 2 and 3 feedwater control system and the safety valves. We were informed that these programs involve cooperative efforts with General Electric, investigations by consultants, collection of data at Dresden and Quad-Cities, and modifications in the feedwater control system.

We request that you provide a detailed description of this program, including quantitative descriptions of the objectives of each program, summary of information obtained and modifications made to date, and a target date for submittal of the final reports. We request that your reply be submitted within 60 days with one signed original and thirty-nine additional copies.

Sincerely,

151

Donald J. Skovholt  
 Assistant Director for  
 Operating Reactors  
 Directorate of Licensing

DATE	8/17/72	8/17/72	8/18/72	8/17/72		

September 28, 1972

For those subjects addressed in the Safety Guides which you do not propose to adopt in your reports, we request that you submit the following additional information:

1. A description of those areas where it is not practical in your facility for you to follow measurements prescribed and the reporting format of the Guides.
2. A description of those measurements which depart either in frequency or in type of analysis from the acceptable program described in the Safety Guides and a justification for the adequacy of your alternate program.

Thank you for your cooperation in this effort to provide a consistent means of reporting information on operating data and effluent releases from nuclear power facilities.

Sincerely,

  
Donald J. Skovholt  
Assistant Director for  
Operating Reactors  
Directorate of Licensing

Enclosures:

1. Safety Guide No. 16
2. Safety Guide No. 21
3. Plant Reporting Requirements
