**Subject: Dresden Station Units 2 and 3
 Proposed Amendment to Facility
 Operating License Nos. DPR-19 and DPR-25
 Concerning Minimum Duration of the
 Integrated Primary Containment Leak
 Rate Test (IPCLRT)
 NRC Docket Nos. 50-237/249**

References (a): Cordell Reed letter to E. G. Case
 dated April 28, 1978

(b): William O. Miller letter to Cordell
 Reed dated May 24, 1978

Dear Mr. Case:

Reference (a) transmitted Commonwealth Edison's request to change the Technical Specification value of the minimum duration for the integrated primary containment leak rate test (IPCLRT) for Dresden Station Units 2 and 3. That letter also transmitted a fee of \$1,600.00 pursuant to 10 CFR 170.

Reference (b) stated that the requested Technical Specification change should be considered a Class III and Class I amendment and not a Class II and Class I amendment as stated in Reference (a). This change in classification represents a fee difference of \$2,800.00.

We accept your classification and have enclosed a check for \$2,800.00. Please direct any additional concerns you may have on this matter to this office.

Very truly yours,

C. Reed
